PROJECT/RESEARCH PAPER

User Review Website

- Developed a user review website that collects technical advice and user feedback in one place.
- Enhanced online market efficiency by providing a centralized platform for feedback collection.
- Implemented technologies: SQL, PHP, HTML, CSS, and DBMS for data storage.

User Reviews on Own Developed Website: An Experimental Study

- Conducted a study focused on providing reviews to online buyers using feedback from previous users.
- Simplified the buying process by offering easy access to product feedback.
- Developed a website for users to gather feedback either online or offline in one place.
- Addressed issues with current feedback systems, including security, data access, authenticity, and review availability.
- Highlighted the inconvenience of checking feedback from different websites for products not available in one place.
